# SUSTAINED

Supreme Court in Exhaustive Raises in Taxes in New Mex- ently padding assessment rolls.

#### \$7.000,000 INCREASE IN VALUATION STANDS

The New Mexico supreme court costerday in an exhaustive opinion ritten by Associate Justice Frank Parker sustained the state board equalization in its norizontal rate classes and counties of \$7.648,083 the tax valuation of property in New Mexico. All the justices concur ed in the opinion which was handed lown in Santa Fe yesterday afternoon. The rolling was made on the case cought by the South Springs Ranch and futtle company of Chaves county igainst the state board of equalization o test the legality of the tax raise as affecting that concern. The plaintiff was represented by J. M. Hervey of Roswell and Renchan and Weight o Sunta Fe and Attorney General Frank W. Clancy appeared for the board of qualisation, of which he is a member.

The syllabus of the opinion follows: The state board of equalization has owe, to equalize the valuation of roperty for taxation purposes by even, both as between classes in the same county and as between counties proughout the state, and the fact that the action taken results in the nurease or decrease of total valuaens in the state is immaterial."

Extracts from the opinion follow: Pirst, the board raised the valuaof a particular class of property a given county or counties to the ne valuation at which it was listed r taxation in some other given ounty; second, the board raised the

country, second, the posterior aluation of the same comparative valuation of ther classes of property, both in the same country and elsewhere throughout the state.

The question, then as to whether the state wourd has power to rayles and correct the tax rolls and, as an original proposition, to value more of the property in the state at what it teems to be on-third of its actual alue, is not involved in this case. The state board has simply brought up to a standard which had been fixed by the taxing authorities of some ounties in the state upon some class of classes of property in the valuation of its other classes of property in the state and that the drift fences as now practiced in the essetter part of the state and that the drift fences as now in use work no hardskip on anyone and in no way restrict the taking up of the public domain.

The delegation expects to remain in Woshington for some time. Governor McDonald bas a number of matters pending before various departments and will be away for several weeks. other classes of property in the eral weeks. nd has, it is to be presumed, accom- during the absence of the governor. ished the purpose for which it was na of taxation upon all of the cit-The state board is necessarily med to have acted upon evidence their judgment is not open to
